About BridgeByBridge

BRIDGEBYBRIDGE – YOUR PARTNER FOR BRIDGE ACCESS EQUIPMENT.

Long-term, reliable partnerships and technical innovation have made us a reference company in our industry in Portugal and Spain. We have been operating on the northern European market since 2013. We are involved in a number of small- and large-scale projects and can count on a steadily growing customer base. Why not also take advantage of our expertise. Choose the right equipment for your project from our range of machinery: there are bybridge truck-mounted platforms, bybridge trailer-mounted platforms, bybridge bucket-type units and much more besides.

With our rental service we give you the opportunity to work with high-quality machines and expert operating personnel at an affordable price, saving both time and money! We will be happy to give you a personal quote tailored to your budget:

About BridgeByBridge

WE HAVE SOLUTIONS FOR EVERY CHALLENGE ON THE MARKET

Thanks to a wide range of vehicle designs we can offer flexible and optimal access to all areas of the structure. The mobility, versatility and simple manoeuvrability of our units mean that they adapt flexibly to the structure being inspected. Accompanying lifts and scaffolding on the platforms guarantee access to even difficult-to-access areas. All machinery comes with a 230V/380V power connection and all underbridge units with a horizontal platform are equipped for night work.

QUALITY AND SAFETY

Our underbridge units require no further supporting elements, which means that there are no additional load contact points at the inspection location. Thanks to short assembly and dismantling times the units are ready for use in a matter of minutes. Audio and video contact on the platform ensures safety is monitored while work is being carried out.

HIGHLY QUALIFIED PERSONNEL WITH MANY YEARS OF PROFESSIONAL EXPERIENCE.

Real commitment in the workplace every day and annual training courses have turned us into a highly efficient team. Take advantage of the knowledge sharing that regularly takes place between our engineers and technicians in Germany, Portugal and Spain as well as the associated low compensatory pricing policy.

DISCOVER OUR SERVICE AND QUALITY FOR YOURSELF

Our vehicle fleet and machinery are regularly inspected, maintained and repaired in line with the EU Use of Work Equipment Directive (89/655/EEC) and any subsequent amendments – in other words, according to current guidelines. Such work is also carried out on-site. As such, you can be sure that the machinery you use is in perfect condition at all times and your project can be completed on schedule.

GOOD REASONS FOR CHOOSING THE BRIDGEBYBRIDGE RENTAL SERVICE:

- State-of-the-art machinery and tools
- The right solution for every bridge access problem
- High availability and adherence to schedules
- Excellent value for money
- Units can be assembled and dismantled quickly
- Punctual and reliable project management
- Europe-wide delivery service directly to where the equipment is needed
- Annually trained personnel with many years of professional experience
- Leading expertise thanks to a network of specialists within the European group of consolidated companies

YOU FACE A CHALLENGE – WE PROVIDE THE SOLUTION.

BridgeByBridge supplies you with the optimal solution so that you can complete your structural services quickly and safely. For information on prices and advice on our equipment, or to discuss your preferred date, call our rental specialists on +351 229 682 282 or send an email to geral@bridgebybridge.com.
